# MERMAID FINANCE

Decentralized Shopping

**We are not going to start an ordinary MEME**

**But the potential of a trillion-dollar market**

**The size of the global overseas shopping market**

**will exceed 5 trillion US dollars in 2021**

**If 0.1% of them are settled with \$MMD**

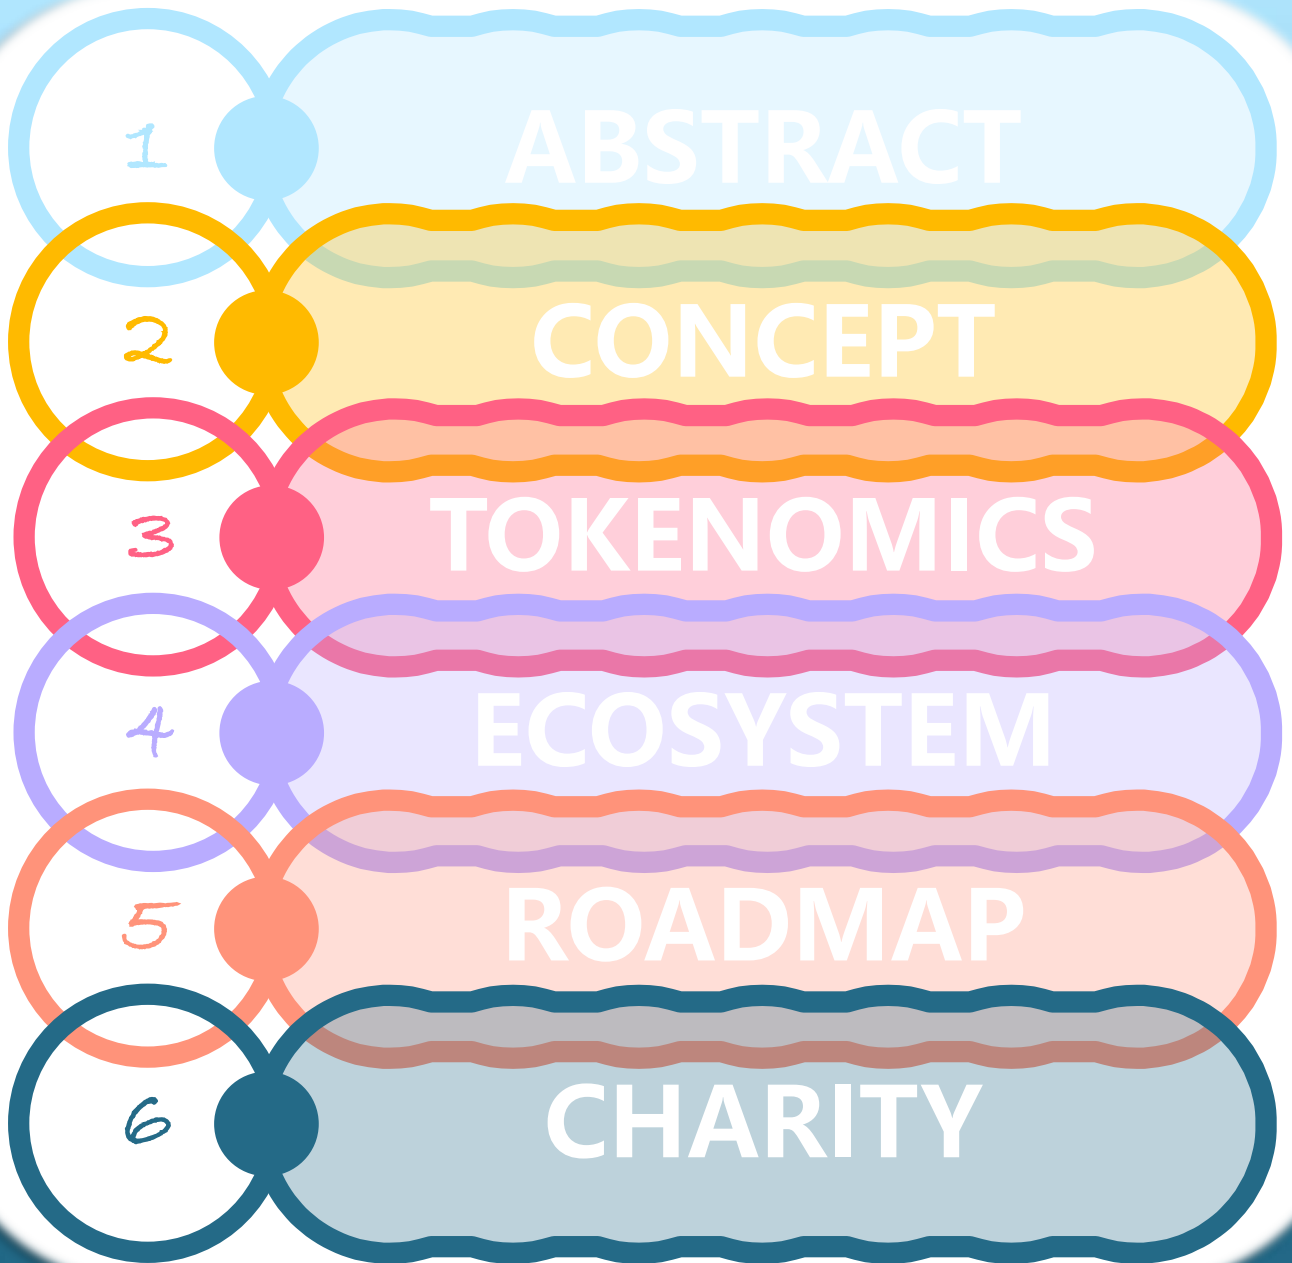

**There will be a market of 5 billion dollars**

**What if 1%?**

# ABOUT MERMAID

Mermaid (\$MMD) is a decentralized token on BSC. 40% of \$MMD have been destroyed, and the rest will be destroyed in each transaction. The project is 100% decentralized and will completely managed by community.

\$MMD has been given the value determination of Mermaid Overseas Shopping Platform since its birth. As the first block chain overseas shopping platform, \$MMD will be the only pricing unit of Mermaid Shopping platform.

Initiated by an anonymous economics professor, \$MMD is a gold medal project sponsored by a consortium of South Korean and attended by enthusiasts from all over the world. The project is committed to the perfect combination of cross-border shopping and virtual currency, and the pricing power will be fully handed over to the community for development. The overseas shopping platform will give \$MMD real value.

\$MMD can meet the multiple needs of investors. The tokenomics will ensure the return of investors, and with the launch of Mermaid Shopping and Mermaid Swap, the interests of investors will be maximized!
